(54) METHOD FOR PRODUCING TAXOL

(57) Abstract:

PURPOSE: To provide a method for efficiently producing taxol by the tissue culture of a plant of the genus *Taxus*.

CONSTITUTION: The characteristic of this method for producing taxol is to culture the tissue of a plant of the genus *Taxus* in a liquid medium produced by adding a gibberelin compound to a medium usually used for the tissue culture of the genus *Taxus* plant. The method enables the efficient multiplication of the cell without reducing the content of the taxol in the cultured cells.
